INTRODUCTION

In an organization such as the Arkansas Department of Health, it is, of course, impossible to acknowledge every one who plays a role in the development of a report of this nature. There are, however, several people and organizations who deserve special mention.

The Center for Health Statistics has primary responsibility for the analysis of vital statistics data and for the preparation of Arkansas Vital Statistics: 1989. This report was prepared under the general supervision of Douglas R. Murray, Director. Werner Haney, Director of Vital Statistics Section, and Dorene Harris, Statistician designed most of the tables in this report. Joyce Eatmon, Research Analyst, generated the tables and prepared the report.

Special recognition must also be given to other staff in the Center for Health Statistics for their contributions to the production of this report. Debbie Campbell (Nosologist) codes and keys cause of death from the death certificates. Bettye Belleton, Ida King, Mary Richardson, Ann Thompson, Zettie Todd, and Judy Tuberville (Documents Examiners) have many duties. These include coding and keying occupation and industry data, data entry of induced abortion and fetal death data, keying all out-of-state birth and death certificates, and many other activities that are essential to the smooth functioning of the Center for Health Statistics. Charlotte Caldwell (Secretary) is responsible for the distribution of the report.

The Division of Vital Records (Henry Robinson, Jr., Director and State Registrar) is responsible for the collection and registration of all vital events. It is the data from these records which are the source of the information presented in this report.

The Division of Data Processing (Gerald Perkins, Director) provided the computer facilities for data entry, management, and analysis.

The Demographic Research Division, Center for Research and Public Policy, University of Arkansas at Little Rock (Forrest H. Pollard and Lawrence Santi, Senior Researchers, and Mary A. McGehee, Research Technician and Programmer) provided the population data which enabled the calculation of many of the rates. The Center for Health Statistics have modified these data to reflect the current statistics, using the 1990 provisional census data.

Through inter-state exchange agreements, most out-of-state occurrences of births, deaths, fetal deaths, and induced abortions are incorporated into this report. However, induced abortion data were not available from Texas and Louisiana for 1989, resulting in slight under-counts of the actual number of events.

DEFINITIONS

AGE - Age in years as of last birthday. For infants, age may be stated in days, weeks or months.

ANNULMENT - Legal invalidation or voiding of a marriage, which confers on the parties the status of never having been married to each other.

DEATH - Permanent disappearance of any evidence of life at any time after live birth.

DIVORCE - Final legal dissolution of a marriage.

FETAL DEATHS (STILLBIRTHS) - Death prior to the complete expulsion or extraction from its mother of a product of human conception, with 20 weeks or more gestation and/or weighing 500 grams or more; the death is indicated by the fact that after such expulsion or extraction the fetus does not breathe or show any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles. (This definition was effective with the 1983 events.)

INDUCED ABORTION (Induced termination of pregnancy) - Intentional termination of pregnancy with the intention other than to produce a liveborn infant or to remove a dead fetus.

INFANT DEATH - Death of an individual under one year of age.

LIVE BIRTH - Complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy, which, after such expulsion or extraction, breathes or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached.

LOW BIRTH WEIGHT BIRTH - Any liveborn infant whose birth weight is under 2500 grams (5 1/2 pounds).

MARRIAGE - Legal union of persons of opposite sex.

MATERNAL DEATH - Death attributable to delivery or the complications of pregnancy, childbirth or the puerperium.

NEONATAL DEATH - Death occurring to an individual less than 28 days of age.

OCCURRENCE, PLACE OF - Place (city, county or state) where the event occurred.

RACE - Recorded as the individual states on certificate for mother, father or decedent.

RESIDENCE, PLACE OF - Usual place of residence. For births and fetal deaths, usual place of residence of mother is used. Residence may be different than mailing address.

SPONTANEOUS ABORTIONS (MISCARRIAGES) - Termination of pregnancy through natural causes and without the aid of mechanical or medicinal agents, with the duration of pregnancy being less than 20 weeks gestation and/or weighing less than 500 grams. (This definition was effective with the 1983 events.)

UNDERLYING CAUSE OF DEATH - Disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury. The cause of death codes used in this report are from the International Classification of Diseases, 9th Edition (ICD-9), as approved by the World Health Organization.

WEEKS GESTATION - The period of gestation (length of pregnancy) is the number of completed weeks elapsed between the first day of the last menstrual period and the date of delivery or termination.

1989 ARKANSAS VITAL STATISTICS: A REVIEW

LIVE BIRTHS

- There were 35,893 births to Arkansas residents in 1989.

  The Arkansas crude birth rate is 15.2, compared to a U.S. rate of 16.2.

  About one out of every five births (7,023) were to mothers 19 and under.

- More than one out of four births (9,943) were to unmarried women.

  More than two thirds (5,751 out of 8,436) of the black, and over one seventh (4,141 out of 27,085) of the white births were to unmarried women.

  Fifty-seven percent of the teenage births were to unmarried teenagers.

- There were 2,974 births weighing less than 2,500 grams or 5.5 lbs. (8.3 percent of the total).

  The percentage of low birth weight births for blacks was 13.8, compared to 6.6 for whites.

- Congenital Anomalies were reported on the birth certificates of 504 newborns (1.5 percent of live births).

  Polydactyly/Syndactyly/Adactyly was the most common condition, with 78 reported cases.

  Malformed genitalia was second with 72 and other musculoskeletal/integumental anomalies was third with 65.

INDUCED ABORTIONS

- There were 5,914 reported induced abortions to Arkansas residents this year.

  A total of 1,757 were to women age 19 and under, 63 of whom were 14 and under.

FETAL DEATHS AND SPONTANEOUS ABORTIONS

- Arkansas had 269 fetal deaths (>=20 weeks) and 1,627 reported spontaneous abortions (<20 weeks).

  Ninety-five fetal deaths resulted from "Complications of the placenta, umbilical cord or membranes", which was the most common cause.

  The fetal death rate (per one thousand live births + fetal deaths) was higher for blacks (11.0) than for whites (6.2).

INFANT DEATHS

- The Arkansas infant mortality rate was 10.1, while the U.S. rate was 9.7.

  Black Arkansans had an infant mortality rate of 15.9, compared to a white rate of 8.4.

- Of the 364 Arkansans who died before their first birthday, six in ten (218) were less than 28 days old.

- "Congenital Anomalies" (birth defects) was the leading cause of infant deaths, claiming 84.

  "Sudden infant death syndrome" (SIDS) was second with 54 deaths, and "respiratory distress syndrome" was third with 33 deaths.

DEATHS

- In 1989, 24,614 Arkansas residents died.

  The Arkansas crude death rate was 10.5, while the U.S. death rate was 8.7.

- The leading cause of death in Arkansas in 1989 was "heart disease", which took 8,310 lives.

  "Cancer", second, caused 5,548 deaths; "cerebrovascular disease" was third with 2,036 deaths.

- "Accidents", the fourth leading cause of death for Arkansans, took 1,302 lives.

  For ages 1 - 34, the leading cause of death was "accidents", accounting for nearly half of the deaths in this age group.

MARRIAGES AND DIVORCES

- There were 34,828 marriages performed and 16,693 divorces finalized in 1989.

  The Arkansas marriage rate was 14.8, compared to a U.S. rate of 9.7.

  The divorce rate was 7.1 for Arkansas and 4.7 for the U.S.
